

Mohamedelfateh Jamal

Senior Data Engineering & BI Specialist

Riyadh, Saudi Arabia | +966 54 764 3006 | eng.mohamedelfateh@gmail.com |
Linkedin: Mohamedelfateh Jamal

Objective

Experienced and results-driven Senior BI & Data Engineering skilled in building enterprise data platforms, automating data pipelines, and delivering advanced analytics solutions. Expert in Azure Synapse, Microsoft Fabric, Power BI, and Airflow, with a proven record of transforming complex datasets into actionable insights that drive strategic decisions. Adept at cross-functional collaboration, data governance, and cloud architecture, with strong leadership in designing scalable BI systems for retail and telecom industries.

Professional Experience

Al-Dakheel Oud – Riyadh, Saudi Arabia

Senior BI & Data Engineering Specialist | Nov 2024 – Present

- Leading the design and implementation of enterprise BI architecture integrating ERP, POS, and financial systems.
- Architected and deployed the Al-Dakheel Data Warehouse (DWH) using Azure Synapse and Microsoft Fabric.
- Automated ETL workflows using Python, SQL, and Airflow to ensure real-time data processing.
- Developed unified data models and governed semantic layers to support Power BI PPU reporting.
- Led the full Microsoft D365 migration to Azure, ensuring seamless transition and data consistency.
- Designed performance dashboards in Power BI for sales, operations, and executive KPIs.
- Integrated Tappy, Tamara, and Gameball APIs for loyalty and POS systems, improving customer insights.
- Built real-time monitoring with Prometheus and Grafana for ETL pipelines and data ingestion health.
- Reduced report delivery time by 45% through process optimization and automation.
- Mentored analysts and engineers to establish data literacy and performance-driven reporting culture.

Kuwaiti Sudanese Holding Company – Zain Sudan | Khartoum, Sudan

BI & Automation Specialist / Data Engineer | Nov 2022 – Aug 2025 (Remote)

- Designed and implemented full-stack BI and Data Warehouse systems for telecom performance monitoring.
- Built LTE Data Warehouse from scratch integrating Spark, PostgreSQL, and ClickHouse for analytics.
- Automated ETL pipelines using Airflow and Spark for 2G/3G/4G network data.
- Developed dashboards in Power BI and Superset for network KPIs and incident tracking.
- Improved data accuracy and reporting reliability by 30% through validation and monitoring scripts.
- Collaborated with network engineers to model and analyze high-volume streaming data.
- Supported management reporting for service quality, downtime, and capacity optimization.

Tranddeal for International Trading Co. Ltd – Riyadh, Saudi Arabia

IT Engineer | Mar 2021 – Oct 2022

- Supported ERP, POS, and IT infrastructure across multiple retail locations.
- Managed system installations, configurations, and troubleshooting of servers and networks.
- Improved operational uptime by ensuring proactive maintenance and issue resolution.

Key Projects

- Microsoft D365 Cloud Migration – Migrated ERP and BI infrastructure to Azure, integrating Fabric and Synapse for unified analytics.
- Al-Dakheel Data Warehouse – Designed enterprise DWH integrating sales, operations, and finance data, enabling executive insights.
- LTE Data Warehouse – Built telecom DWH from scratch integrating Spark and ClickHouse for high-performance analytics.
- EMS Full Stack Project – Implemented Hadoop, Spark, Airflow, and Superset for real-time network KPI tracking.
- Automation Framework – Developed Airflow DAGs and Python scripts for automated data ingestion and transformation.
- POS Integration & Monitoring – Integrated Tappy, Tamara, and Gameball with Grafana-based performance dashboards.

Education

Mashreq University | Bachelor of Mechatronics Engineering | 2021 | Degree: Very Good

Technical Skills

- Data Engineering: Apache Spark, Airflow, Kafka, Talend, Hadoop, Databricks
- BI & Visualization: Power BI, Superset, Looker Studio, Qlik, Excel
- Cloud Platforms: Azure Synapse, Microsoft Fabric, AWS, GCP, Oracle Cloud
- Programming: Python, SQL, Java, Scala, Bash
- Databases: PostgreSQL, MySQL, ClickHouse, MongoDB, Cassandra
- Automation & Monitoring: Airflow, Prometheus, Grafana, ETL Orchestration
- Data Modeling: Star/Snowflake Schema, Data Governance, Real-Time Analytics
- Tools & DevOps: Git, Docker, CI/CD, Linux Administration
- Soft Skills: Leadership, Collaboration, Communication, Analytical Thinking

Achievements & Awards

- Top Talent Award – Kuwaiti Sudanese Holding Company, Sep 2023
- GTD (Getting Things Done) Award – Kuwaiti Sudanese Holding Company, 2023
- Recognized for leading BI modernization initiative improving reporting efficiency by 40%.

Certifications

- Google IT Support – Coursera, Jul 2022
- Power BI – Coursera, Feb 2024
- Talend Data Integration – Coursera, Apr 2024
- Machine Learning with Python – IBM, Apr 2024
- Gen AI – Coursera, Apr 2024
- OCI Foundation Associate – Oracle Cloud
- ITIL 4 Foundation – Percipio, Dec 2022
- Cloud Dataproc: Hadoop and Spark – Google Cloud, Aug 2024
